Product Features

- 840H x 600W x 35D (mm)
- Tube Size = 32mm 304 Stainless Steel
- Highly Polished Stainless Steel
- Lifetime Guarantee On Towel Rail
- 2 Year Guarantee On Electric Items

Product Characteristics

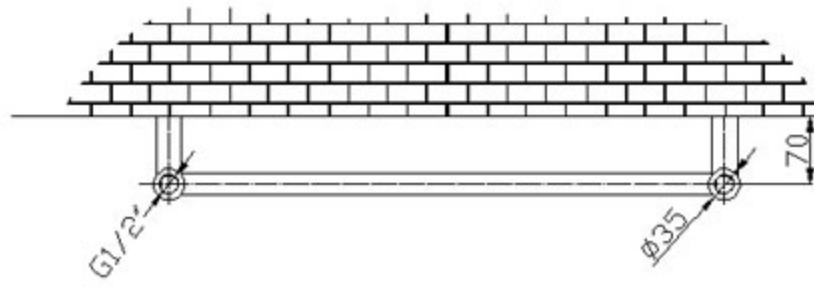

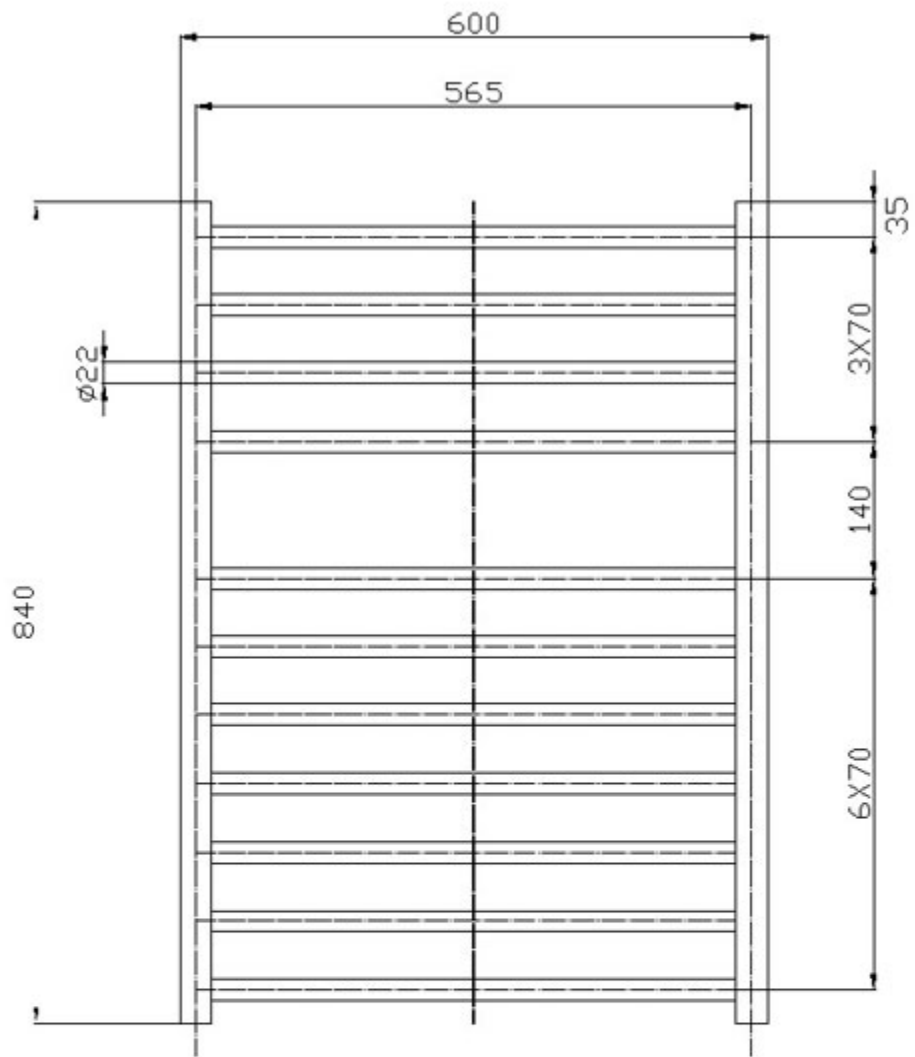

- 304 Graded Stainless Steel gives the towel rail / designer radiator a prolonged existence and better corrosion protection in the market.
- 304Stainless steel towel rails are one of the highest grades in the market these are a new line of stainless steel towel rails.
- This type of is environmental friendly.
- It suites in every kind of bathroom
- Type 304 Stainless Steel has a high resistance to rust.
- Therefore it has a long lasting capacity to work.
- Due to its own nature and properties will not corrode or flake.
- It also is easy to clean and is completely hygienic with no recognized health risks.

Properties of 304 Stainless Steel

Stainless steel is produced from 90% recycled metal, is manufactured environmentally and is 100% recyclable itself. Our towel rails and radiators will last a lifetime as they are manufactured from Type 304 Stainless Steel welds. Small marks and scratches can be polished out so the towel rail or radiator of your choice will at all times look fantastic. This makes a towel rail or radiator of this class the best decision to make in order to heat your home. As our towel rails and radiators are made from a Type 304 Stainless Steel, it holds back rust unlike some other towel rails and radiators which possess a lesser grade.

Type 304 Stainless Steel is a variation of the basic '18/8' grade, Type 302, with higher chromium and lower carbon content. This lower carbon content minimises chromium carbide precipitation due to welding and it's susceptibility to intergranular corrosion. Type 304 Stainless Steel can be exposed continuously to a maximum temperature of 899°C (1650°F) without appreciable scaling. For intermittent exposure, the maximum temperature is around 816°C (1500°F). Types 304 Stainless Steel have very good drawability. Their combination of low yield strength and high elongation permits successful forming of complex shapes.

Technical Diagram

MEG Digital Thermostatic Heating Element in Chrome 300 watts

PROBLEMS ORDERING ON LINE:-

Any ordering problems please contact support at sales@tradeplumbing.co.uk

Normally most problems when ordering are Ad-aware popup blockers. To solve this go to tools and internet options clear the cookies & history as this solves 90% of order problems.

Some times you will have to disable your popup blocker or allow pop-ups from our site. If you do have any problems or find faults on our website please email sales@tradeplumbing.co.uk .

WHY NO TELEPHONE NUMBERS FOR ORDERING

If you would like to contact us directly we do offer an e-mail/phone back service but this is for limited usage as we prioritise emails. All you have to do is email us your information and any questions you need answering. We will either reply by phone/email with the answer to any questions.

We do this to cut costs of using a call centre thus competitive prices in reflection.

NEED HELP

We have added a mobile phone number to help you if in you need to consult someone in a difficult situation. We only offer these services as the last resort for you as the customer.

We do not have a phone system as this will increase the prices of our products. As a company that prides itself on customer service and competitive pricing we give you - the customer the best price in the UK and to do this we have to cut costs.

**IF YOU DO NEED TO CONTACT US BY PHONE PLEASE CALL
(BETWEEN THE HOURS OF 9AM-5PM ONLY ON 0870 803 4288.
ONE OF THE TEAM WILL TRY TO HELP WITH YOUR PROBLEM**
